

UNIQUE AIR PURIFICATION

CLEAN INDOOR AIR IS AN IMPORTANT PART OF SAFE AND RESPONSIBLE WORKPLACE ACTIVITIES

Workplace personnel and other users of the premises can be protected against airborne impurities as soon as problems arise, and chronic indoor air symptoms are prevented by using a high-quality, tested air purifier.

Even if an actual indoor air problem has not been established, every workplace has particle and gaseous impurities. These come from, for example, building materials, people and clothing as well as the impurities carried through air leaks in the ventilation and structures.

UniqAir is a Finnish air purifier whose unparalleled efficiency is based on a high-quality EPA filter and a large quantity of unique activated carbon. UniqAir filters harmful impurities from the air, including organic and inorganic compounds, ammonia, domestic and animal dust and pollen, mould and other fine particles. What makes UniqAir special is its unique ability to filter toxins.

UNIQAIR – A HIGHLY EFFICIENT INDOOR AIR PURIFIER!

The UniqAir air purifier contains a unique activated carbon combination. The device comes with a high-quality E11 class EPA filter in accordance with EN 1822 as standard. A H13 class HEPA filter can be ordered separately.

UNIQUELY CLEAN AIR

INDOOR AIR IS CIRCULATED THROUGH THREE HIGH-QUALITY FILTERS.

1. The coarse filter removes the largest impurities, such as domestic dust and pollen, from the air.
2. The effective activated carbon comprehensively filters gaseous impurities, such as inorganic and organic compounds, ammonia and, among other things, the smell of tobacco smoke.
3. The EPA filter removes, for example, fine particles, microbes, mould and other causes of allergic reactions. The result is very clean and healthy indoor air.

EASY MAINTENANCE, IMMEDIATE EFFECT

UniqAir provides you with better indoor air immediately after it has been plugged in. The only maintenance measures are replacing the coarse filter every 4–6 months and the activated carbon filter every 12 months.

UniqAir Ltd – For clean air

UniqAir is the only air purifier in the world with an activated carbon combination that filters impurities in a way unmatched by other filters.

UNIQAIR REMOVES

Allergens
Mould
Viruses
Bacteria
Microbes
Dust and pollen
Smells
Ozone
Ammonia
Organic compounds (VCC)
Inorganic compounds

TECHNICAL SPECIFICATIONS¹

Height [mm] 1,035 or 1,200
Width [mm] 318 or 388
Depth [mm] 318 eller 388
Clean air delivery rate [m³/h] 86/155 or 148 /189
Noise level [dB(A)] 29.5/38 or 34/39 ²
Power consumption [W] 17/32 or 35/77

¹Applies to two different sizes

²At 2 meters distance and a background noise level of 33dB

QUIET AND EASY TO USE

DESIGN BY **HARRI KOSKINEN**

The UniqAir air purifier is very quiet and easy to use with just one switch. In addition to the operating switch, the elegant air purifier only includes a power cord – the clear-cut design does not clash with other decor. The UniqAir air purifier is designed by Harri Koskinen and is based on Finnish manufacturing and innovation.
